- The website links clients to the closest service providers whereby they log in and based on their location, services offered by providers within their location are displayed.

PROJECTS

Attendance Tracker

🔗 <https://attendance-tracker-psi.vercel.app/>

Short summary of my project (Kindly go through it before clicking the link)

- The website functions with the admin hardcoded into the database, responsible for creating teacher accounts and providing login credentials. Once teachers log in, they are directed to a dashboard where they can manage students, create lessons, add students, and view attendance reports. Teachers then distribute login details to students, who can access their attendance reports, view upcoming lessons, and mark their attendance for current lessons.

PASSIONS

**Technology and Innovations**

**Collaboration and teamwork**

REFEREES

Clinton Sang

Senior Software Engineer,

Sany Dev.
